

ANTI-STATIC BARS

3024 ULTRA-COMPACT 24 V DC IONISER

An ultra-compact 24 V DC Static Eliminator, ideal for installation in areas where space is at a minimum. Powerful, compact and easy to install.

Static neutralisation to meet the requirements of high-performance machinery at close range. Integrated power supply, requires only a low voltage 24 V DC input.

- > Shockless, resistively coupled tungsten emitters for unlimited life.
- > Pulsed DC high voltage provides excellent charge decay performance even at longer distances.
- > Ion balance suitable for most industrial applications.
- > Ideal operating range 20 - 150 mm.
- > Remote monitoring of operational status.
- > LED status indication:
Green = OK, Green/Red flashing = Attention required, Red = Fault, Red flashing = Standby.
- > Standard M8 4-pin connector.
- > Integrated high voltage electronics means no high voltage cables required.
- > Protected against under-voltage, overload and reverse polarity.
- > Easy to mount via integrated fixing holes.
