

# CAST-X 4000

## Circulation Heater

With up to 60 kW of power and hazloc-safe designs, CAST-X 4000 fits with many oil & gas processes.

Designed and manufactured by Cast Aluminum Solutions (CAS), CAST-X Circulation Heaters are engineered using the latest thermal modeling and finite element analysis technology. CAST-X heaters feature low-watt-density heating elements cast into aluminum bodies which also contain the helical-coiled stainless steel flowpath tubes.

The media is sequestered in these tubes, never touching the heating elements: a critical safety benefit, especially when heating explosive or sensitive media. All CAST-X units are capable of heating liquids and gases alike.

CAST-X heaters are self-draining, for safety and cleanliness. With compact, non-welded bodies, plus NEMA & ATEX enclosures, CAST-X units are small-footprint, high-output heaters that meet the needs of high-purity processes, flammable operations, and your most critical heating applications.

### APPLICATIONS:

- Distillation of Fuel Oils
- Oil and Water Separation
- Fuel Oil Preheating for Burners and Boilers
- Heating for Food and Beverage Applications
- Steam Generation and Superheating
- Fuel and Oil Heating for Test Stands
- Dry Gas Seal Applications
- Methanol to Olefin Conversion

### SPECIFICATIONS:

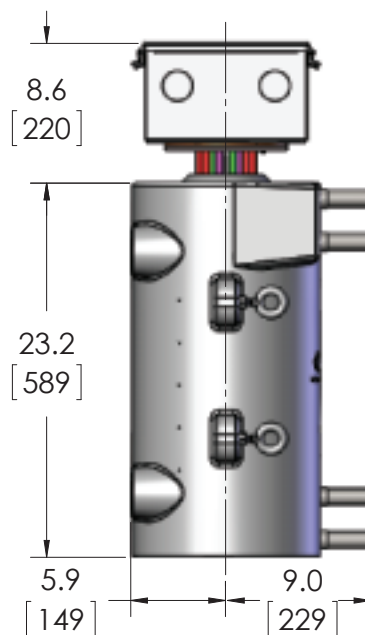

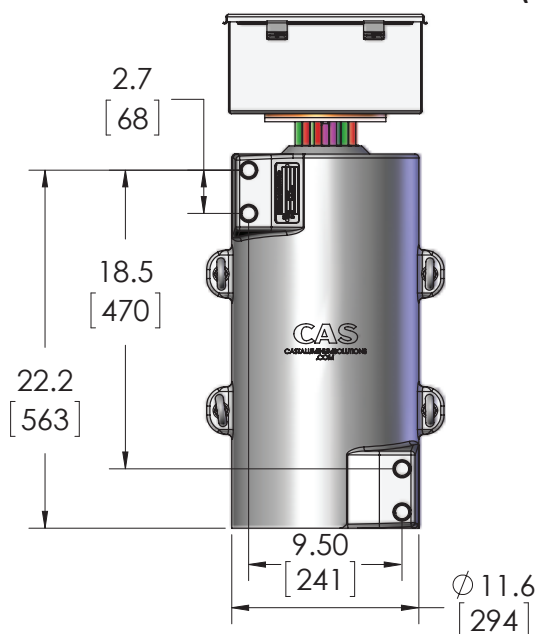

- Power:
    - 12.5 kW Total to 60 kW Total
    - Voltage Range: 208 - 480 V
    - Max Line Current: 50 A per circuit
  - Tubing:
    - 1.0" OD (25.4 mm)
    - .083" Wall (2.1 mm)
    - Overall Process Tube Length: 212" (5384 mm) each
    - 316L Stainless Steel (standard)
    - Inconel (optional upgrade)
    - Passivated or Electro-Polished (optional upgrades)
  - Max Pressure: 3100 psi (213 bar)
  - Enclosures:
    - NEMA 4 (moisture-resistant)
    - NEMA 7 / ATEX (explosion-proof)
  - Max Working Temperatures:
    - NEMA 4 (moisture-resistant): 572°F (300°C)
    - NEMA 7 / ATEX (explosion-proof): 662°F (350°C)
- Published temperatures are for housing at 12 o'clock position; higher temps may be possible at 6 o'clock position. See factory for details.
- Sensors:
    - K or J Type Thermocouples Standard
    - RTD (resistance temperature detector)
  - Available Accessories:
    - Insulating Jackets
    - Compression Fittings

### FEATURES & BENEFITS:

- SS 316L Fluid Path is Separate from Heating Elements (allows safe heating of sensitive materials and prevents contamination)
- Extremely Powerful for Its Size
- Self-Draining (reduces fumes, increases safety)
- Robust Cast-In Construction (for long heater life)
- Wide Application Compatibility (including high pressure)
- Operable in Single-Tube or Dual-Tube Mode
- Dual Tube Mode Can Run in Series or Parallel

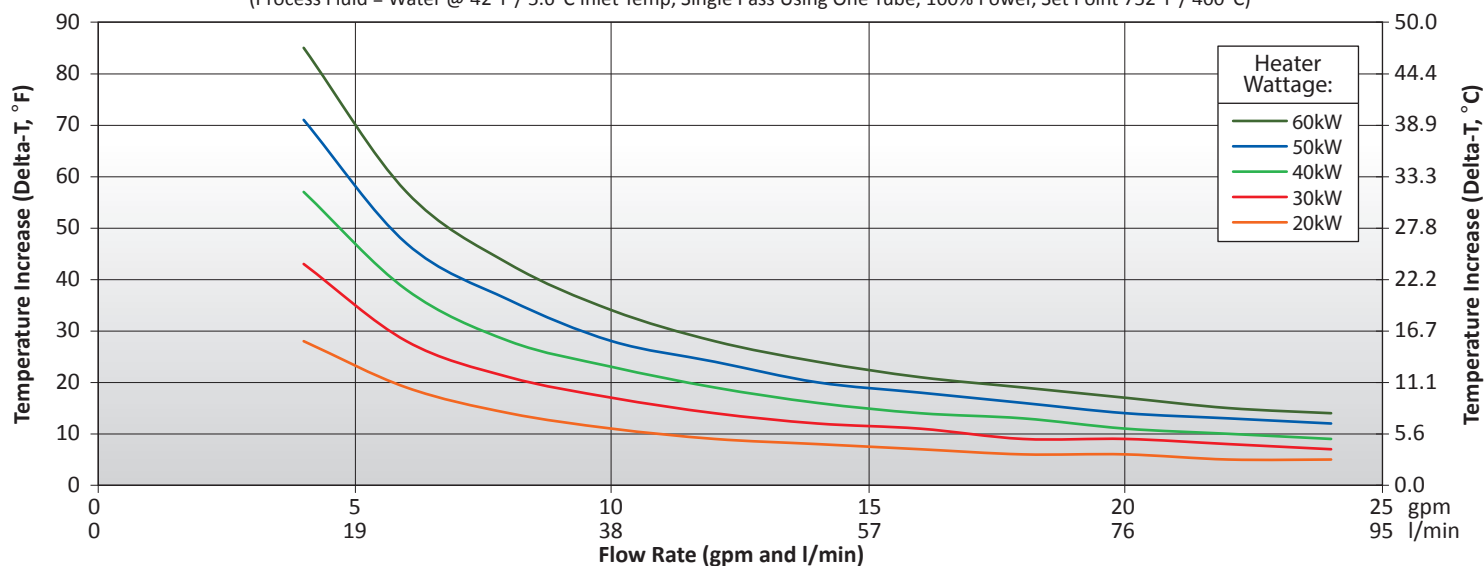

# CAST-X 4000 Circulation Heater

MOISTURE-RESISTANT  
(NEMA 4) ENCLOSURE

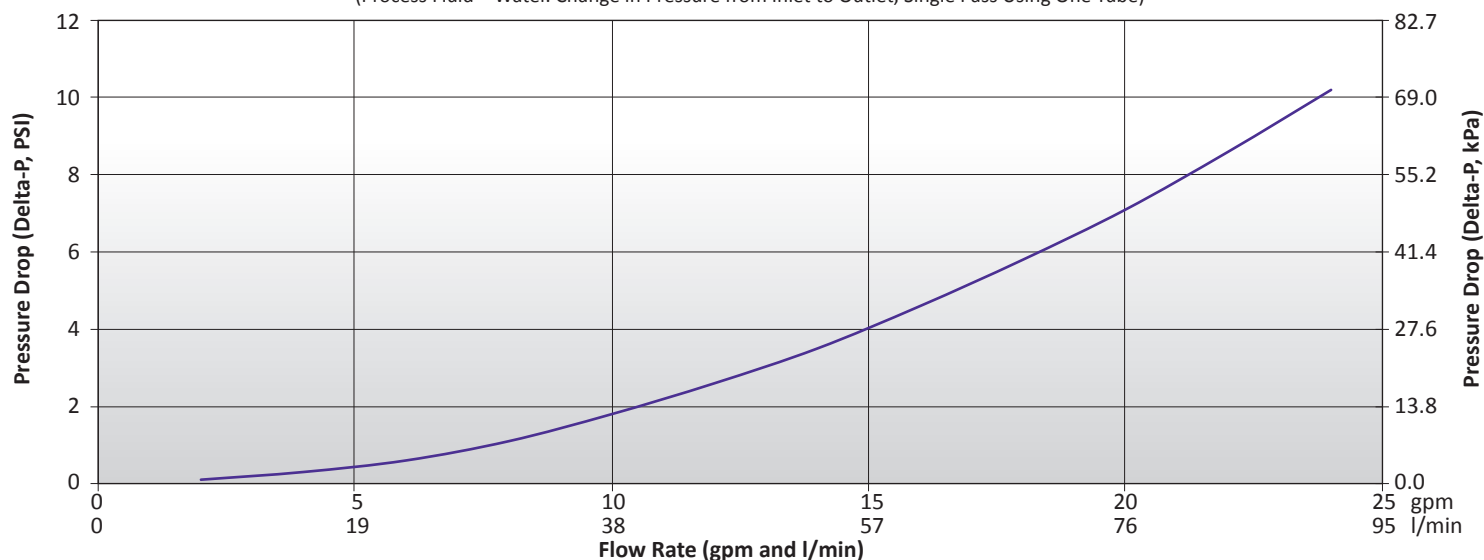

## CAST-X 4000 Heating Profile: Delta-T Water

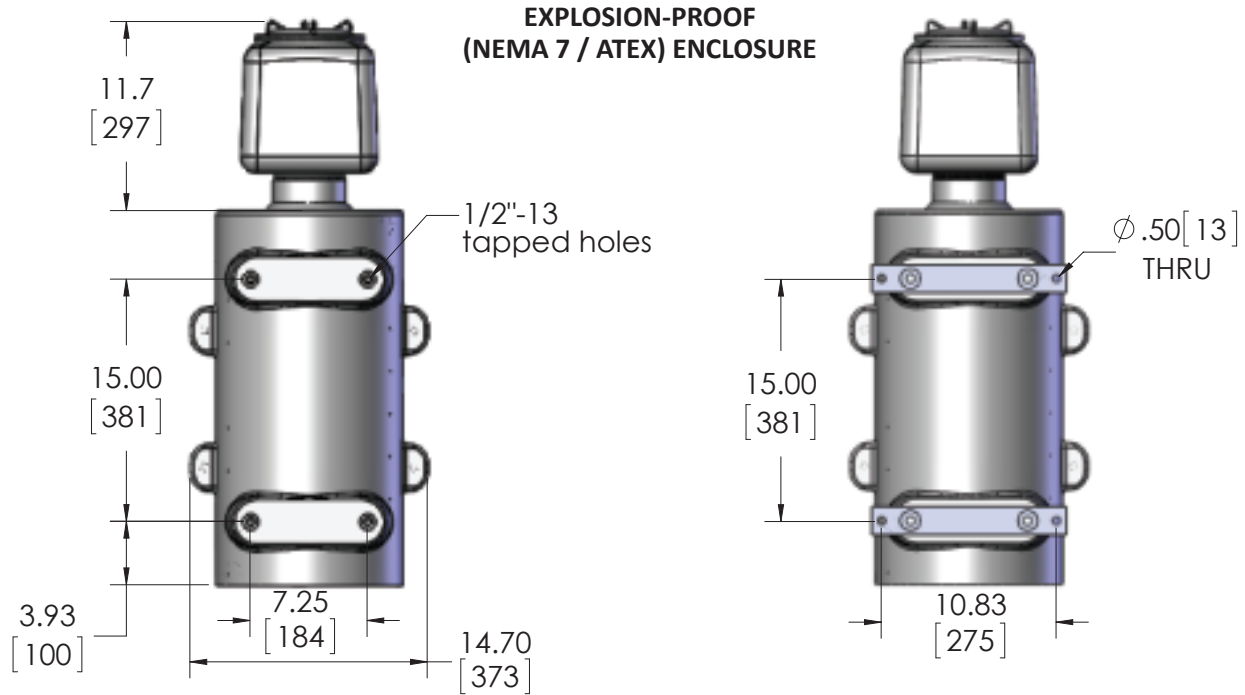

(Process Fluid = Water @ 42°F / 5.6°C Inlet Temp, Single Pass Using One Tube, 100% Power, Set Point 752°F / 400°C)

## CAST-X 4000 Pressure Drop Profile: Delta-P Water

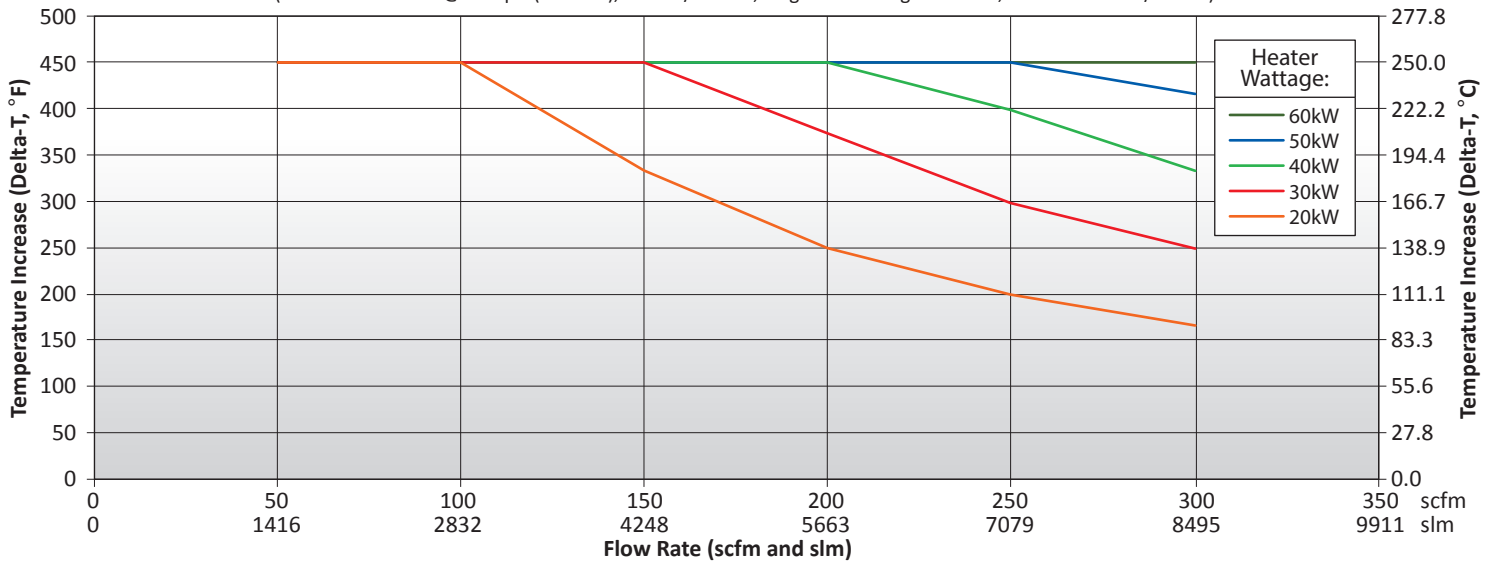

(Process Fluid = Water. Change in Pressure from Inlet to Outlet, Single Pass Using One Tube)

**CAST-X 4000 Heating Profile: Delta-T Air**

(Process Fluid = Air @ 100 psi (689 kPa), 70.7°F / 21.5°C, Single Pass Using One Tube, Set Point 752°F / 400°C)

**CAST-X 4000 Heating Profile: Delta-P Air**

(Process Fluid = Air @ 100 psi (689 kPa), 70.7°F / 21.5°C, Single Pass Using One Tube, Set Point 752°F / 400°C)

# CAST-X 4000 Circulation Heater

Engineering Expertise • Speed to Market • Operational Excellence

Cast Aluminum Solutions (CAS) manufactures the CAST-X line of circulation heaters, plus a broad range of heating, cooling, and non-thermal components. We are relied upon by OEMs and end-users alike throughout the semiconductor, medical device, aerospace, industrial gas, fluid-handling, food equipment, and energy markets.

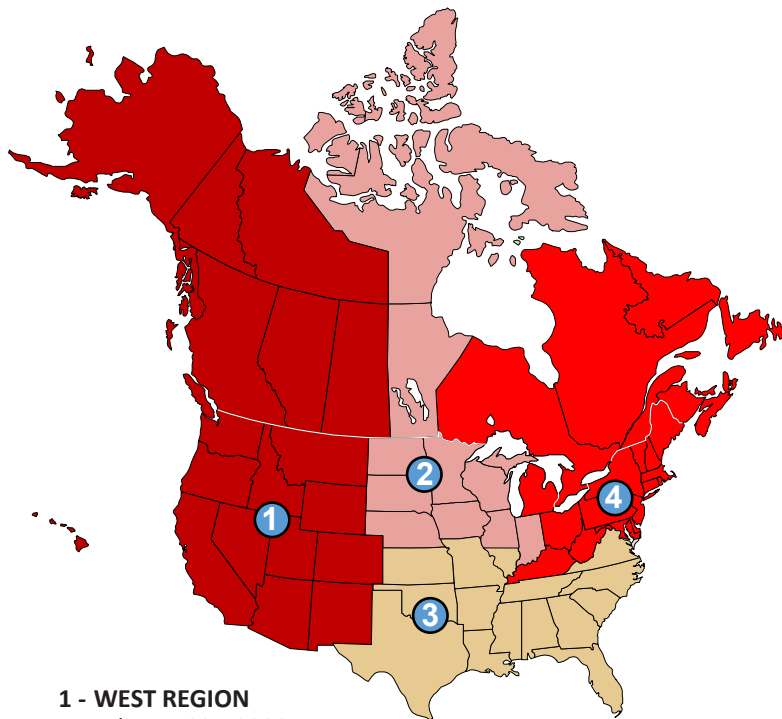

Our multi-discipline team of engineers and technicians works closely with customers to develop practical solutions to complex process challenges. We utilize industry standard applications such as Finite Element Analysis (FEA), SolidWorks® 3-D CAD technology, and a range of structural analysis & thermal modeling tools.

CAS is an ISO 9001 Certified company with a fully-equipped R&D facility. Testing capabilities include X-Ray, ultrasound, helium leak, and infra-red technology, plus the latest coordinate measuring machines (CMM). Our in-house casting facility utilizes a permanent mold low-pressure casting process which reliably produces low-porosity, high-quality aluminum products. We offer an array of precision CNC machining options, finishing options such as electroless nickel plating, Teflon® coatings, clear-coat and hard-coat anodizing, plus high-value-added testing and inspection services.

Headquartered in Batavia, Illinois (just outside Chicago) we serve customers worldwide.

See the below map to locate a Sales Engineer, or contact CAS directly. We look forward to working with you.

With offices worldwide, the CAS Team of knowledgeable and experienced representatives is ready to assist with your project.

### Building a CAST-X 4000 Part Number

Use the graphs below to build your CAST-X 4000. Assigning numbers for sections AE, B, C, F, and G.

For Heater Wattage, make selections in position A and E. The characters after C and G will always be "0" (zero).

For assistance, contact CAS directly.

### VOLTAGE, POWER, CIRCUIT TYPE

*Volts refers to line volts ( $V_L$ ). Amps refers to line current ( $I_L$ ).*

| Sections "A" and "E" | Circuit Type                                   | Volts (V) | Watts (kW) | Amps (A) (per circuit) |
|----------------------|--|-----------|------------|------------------------|
| 1 1                  | ONE WYE CIRCUIT                                | 415       | 20         | 27.9                   |
|                      |  | 400       | 18.6       | 26.9                   |
|                      |  | 380       | 16.8       | 25.5                   |
| 1 2                  | TWO WYE CIRCUITS                               | 415       | 40         | 27.9                   |
|                      |  | 400       | 37.2       | 26.9                   |
|                      |  | 380       | 33.6       | 25.5                   |
| 1 3                  | THREE WYE CIRCUITS                             | 415       | 60         | 27.9                   |
|                      |  | 400       | 55.8       | 26.9                   |
|                      |  | 380       | 50.4       | 25.5                   |
| 1 4                  | ONE DELTA CIRCUIT                              | 240       | 20.1       | 48.3                   |
|                      |  | 230       | 18.5       | 46.3                   |

### Need Help with Part Numbers or Engineering Calculations?

One of the key advantages of working with CAS is the accessibility of our team and ability to offer assistance. The CAS Team is ready and available to help work through part number configurations, provide engineering advice, and ensure customers purchase the heater most appropriate for their particular application.

Our mission is developing solutions, from concept to reality.  
So feel free to contact the CAS Team directly:
